Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 9-15, drawn to a method and apparatus for producing nanoparticles by injecting a liquid below the surface of a cryogen, classified in class 62, subclass 64.
- II. Claims 16 and 18-22, drawn to a particle, classified in class 424, subclass 491.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case claim 16 is a product by process claim. This covers all products which possess the properties of products produced by the process, whether or not the products are produced by the process. The particle of claim 16 has no defining characteristics and no characteristics are found to be inherent by performing the method of claim 10.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Elisabeth Jozwiak on 1-9-2004 a provisional election was made without traverse to prosecute the invention of group I,

claims 1-7 and 9-15. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16 and 18-22 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C Doerrler whose telephone number is (571) 272-4807. The examiner can normally be reached on Monday-Friday 6:30-4:30.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Elisabeth Jozwiak on 11-9-2004.

The application has been amended as follows:

In claim 1 line 3, change "for holding" to --containing--.

In the last line of claim 10, after "particles" insert --having a size range of 10nm to 10 microns--.

Cancel nonelected claims 16 and 18-22 (restriction enclosed).
